BX258	Baxter Healthcare Pty Ltd FloSeal Hemostatic Matrix	FloSeal is a proprietary combination of specially engineered collagen derived particles and topical thrombin. FlowSeal is not a sponge or a fibrin glue, rather it is a high viscosity gel for hemostasis. Clinically proven (refer Appendix 1; Section 2-4) to control bleeding from capillary oozing to arterial spurting, FloSeal functions on wet and actively bleeding tissues. FlowSeal Matrix consists of a bovine derived Gelatin Matrix component, a human derived Thrombin component, applicator tips and several mixing accessories. The Gelatin Matrix consists of crosslinked gelatin granules and is provided sterile and non-pyrogenic in a standard disposable syringe. The Thrombin (Human) is a sterile, non-pyrogenic, freeze-dried, vapour-heated powder preparation made from pooled human plasma. A sterile, non-pyrogenic calcium chloride solution is provided for reconstitution of the thrombin. After reconstitution, the resulting thrombin solution contains 500 IU/mL Thrombin (Human). FloSeal Matrix is the combination of the Gelatin Matrix component and the reconstituted Thrombin (Human) component. Thrombin must be added to the Gelatin Matrix component prior to use.	5mL,	\$700.00

OH303	ADD / ADDplus	Addplus is a winged anterior distraction device and is also used for vertebral column replacement which can be used for the anterior cervical column and for the cervico-thoracic transition. The Adplus effects the reconstruction, support and stabilization of the anterior column. The fixation on the vertebral bodies is effected by means of screws from the osmium system, with a monocortical as well as a biocortical screw anchoring being possible. The additional wings prevent a migration as well as possible sinking in of the implant. The ADDplus is made from titanium alloy.
