

## **PHI 38/22 – Prostheses List Reforms – Post-listing Review Framework published**

We have published Information about the framework to guide the Post-listing review of products on the Prostheses List.

**Date published:**

1 July 2022

**Type:**

PHI circular

**PHI circular type:**

Prostheses announcement

**Intended audience:**

Health sector

The purpose of the Post-listing Review Framework is:

- to improve post listing processes
- to carry out utilisation reviews and post-market reviews incorporating Health Technology Assessment (HTA)
- to support other post-listing activities.

The Department is currently undertaking pilot reviews on certain groups of devices. Further information on the framework, types of reviews, different activities and processes are outlined on the [Prostheses List Reforms webpage](#) on the Department of Health and Aged Care website.

We will update the webpage regularly to notify stakeholders on different stages as we progress the reviews.

Please send any comments or feedback on the draft Post-listing Review Framework to [PLReviews@health.gov.au](mailto:PLReviews@health.gov.au).
