Zimmer Biomet Pty Ltd	13 - Spinal	ZA036	C-Plate - Fixed and Variable Screws	C-Plate Anterior Cervical Plates are inserted via an anterior approach to the cervical spine, in order to fix one or two levels of vertebrae together. Such fixation is performed to cause bony fusion between the levels and is done in order to address pain, instability, and/or a range of other indications. The C-Plate system consists of low-profile (1.6mm thick) pre-contoured plates of varying sizes and a full range of screws. The plates themselves contain an innovative screw-locking mechanism utilising an elastic locking ring which allows the surgeon choice between semi-fixed or variable-angle self-tapping screws.	Diameters: 3.5mm and 4.0mm, with lengths ranging from 10mm to 20mm in 1 mm increments	1/03/2020	DELETE

Zimmer Biomet Pty Ltd	13 - Spinal	ZA049	C-Plate - Cervical Plates 56-70mm	C-Plate Anterior Cervical Plates are inserted via an anterior approach to the cervical spine, in order to fix one or two levels of vertebrae together. Such fixation is performed to cause bony fusion between levels and is done in order to address pain, instability, and/or a range of other indications. The C-Plate System consists of low-profile (1.6mm thick) pre-contoured plates of varying sizes and a full range of screws. The plates themselves contain an innovative screw-locking mechanism utilising an elastic locking ring which allows the surgeon choice between semi-fixed or variable-angle self-tapping screws.	Lengths: 56 to 70mm in increments of 2mm	1/03/2020	DELETE

Zimmer Biomet Pty Ltd	13 - Spinal	ZA054	ROI-T TLIF Cage	ROI-T is a TLIF (Transforaminal Lumbar Interbody Fusion) interbody fusion cage manufactured from PPEK-Optima, designed for ease of insertion and graft maximisation. The transforaminal approach allows for exposure of the disc space by removing the facet joints and protecting the nerve roots. The disc space is entered and disc material is removed. The ROI-T cage is filled with bone graft material and is placed into the cage space to maintain the disc height and impart additional stability to the construct. Note that ROI-T cages must be used in conjunction with a posterior screw and rod system to properly stabilise the segments and	Lordotic angles 0, 5 and 9 degrees. Length 30mm.
