PHI circular type:

Prostheses announcement

Intended audience:

Health sector

The prostheses list reform taskforce has published information about the CIRG

The role of the [Clinical Implementation Reference Group \(CIRG\)](#) is to provide clinical advice to the Department to support the effective implementation of changes to the Prostheses List as part of the Prostheses List Reforms.

Details regarding the group, such as membership and CIRGs Terms of Reference, including outcome notes of the first two meetings, can be accessed from the [committee page](#).

The CIRG will meet monthly, with additional meetings taking place if required. The group is established initially until 30 June 2022.
