PHI 85/23 Draft Prescribed List Guide

Publishing a draft of the Prescribed List of Medical Devices and Human Tissue Products Guide

Date published: 21 December 2023

PHI circular type: Prostheses announcement

Audience: Health sector

We previously advised about the continuing work on revising the Prescribed List of Medical Devices and Human Tissue Products Guide (Prescribed List Guide) and our plan on publishing a draft in late December.

This draft of the Prescribed List Guide will provide sponsors with assistance in preparing their applications.

When sponsors consider this draft version of the Prescribed List Guide, it is important to note that this is a draft only that will be further amended and edited.

We will continue work on refining and incorporating the required changes, and the Prescribed List Guide will also undergo professional editing. The Prescribed List Guide is expected to be finalised and released in the first quarter of 2024.

Please note the due date for submitting applications for 1 July 2024 Prescribed List is midnight on 14 January 2024 (the 2nd Sunday of January).
