HAVING PRIVATE COVER MEANS:

Avoiding long public hospital wait lists

Choosing your specialist

Choosing the timing of your procedure

Continuity of care with the same fully-trained Doctor

YOUNG PEOPLE RECEIVE VALUE FROM PRIVATE COVER

MENTAL HEALTH CARE

About 1 in 5 hospital claims for members under 30 are for mental health treatment

DENTAL CARE

Access to affordable dental care at a critical life stage. 14.4% of annual industry expenditure on member claims relates to dental services

SPORT INJURIES

Timely elective surgery, rehab and physio coverage for common sports injuries like ACL injury and torn meniscus

ELECTIVE SURGERY

PHI funds 57% of endometriosis-related hospitalisations²

IN THE PUBLIC SYSTEM:

293 days

median wait time for a total knee replacement³

72,024

Victorians are on a wait list for elective surgery as at 30 June 2023⁴

299 days

average wait time for non-urgent elective surgery in NSW⁵

8 months

on average longer wait in the public system to see a specialist in Western Australia⁶

PRIVATE HEALTH INSURANCE FUNDS:

≈2 out of 3

of elective surgery

76%

of all hospital admissions for rehabilitation care

55%

of all hospital admissions for mental health care

57%

of all joint replacements

4 in 5

hospital admissions in private hospitals

1 in 2

Australians claim for dental services through a health fund

PRIVATE HEALTH, PUBLIC BENEFIT

Australia relies on a balanced private and public health system. 55% of Australians currently have private health insurance. PHI takes the pressure off public hospitals and reduces wait times for everyone. It saves public hospital beds for people who need them most.
